-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's response dated 03/23/2006 has been received and entered. Claims 1-7 and 21 are remain pending in the application.

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al., US Patent No. 5,805,246.

Lee et al disclose a display device (liquid crystal display LCD device)(figures 3A and 3C) comprising:

- . a plurality of pixels (arranged in matrix of 1 and 2);
- . a metal wiring (gate pad 1');
- . a plurality of gate lines (1), wherein each of gate lines comprising a first gate line (left portion of the metal wiring (6)) and a second gate line (right portion of the metal wiring);
- . a gate driving circuit (7);

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 5-7 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al., US Patent No. 5,805,246, in view of Kang et al., US Patent 6,190,934.

Regarding the above claims, Lee et al. disclose the claimed invention as described above excepted for the based material for gate line, the metal wiring as well as the distance between the first and second gate lines. Kang et al. disclose a metal wiring (e.g. gate pad 115a/157) having a length larger than 10 μ m (col. 6, ln. 33) and made of a material (e.g., 115a made of aluminum, col. 5, ln 2) different from that of a gate line (113 made of chromium) as well as the metal wiring (gate pad 157) over the gate line (113)(see figure 7e). Therefore, it would have been obvious to one skilled in the art at the time of the invention was made to employ a metal wiring (e.g. gate pad) having a length as shown by Kang et al. between the Lee et al. first/second portion gate lines (i.e., a distance therebetween would be larger than 10 μ m) as well as the Lee et al. gate line and the metal wiring having a based material as shown by Kang et al. in order to prevent a defect or damage and protect a display quality produced on an LCD (col. 6, ln 65).

Art Unit: 2871

Allowable Subject Matter

5. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6.
